NAFTOBLEND ACFR-01

Naftoblend ACFR-01 is an innovative product that has a high flame retardancy effect. This multifunctional solution is compatible with PVC and various polymer systems, including polyamides, polyethylene, polypropylene, epoxy, polyesters, elastomers, and rubber.

- Replaces Antimony Trioxide (Sb_2O_3) by 1:1 ratio.
- More sustainable and environmentally friendly
- Cost effective
- Enhanced performance with efficient smoke suppression
- Excellent color performance
- Compatible with all plastics and rubber systems
