

BENZOATE BASED PLASTICIZERS

Benzoate based plasticizers are non-phthalate, high-performance additives designed to improve the flexibility, softness, and resilience of polymers, making them ideal for a wide range of applications. They are widely used in manufacturing of food packaging, toys, adhesives & sealants, flooring, wall coverings and automotive interiors.

- Non-Phthalate composition
- Enhance performance
- Low volatility
- High extraction resistance
- Excellent compatibility with various resins
- Improve flexibility and softness

Application Areas

Product Form  Liquid

Application	Uses
Vinyl Applications	Plastisol Flooring
	PVC Melt Compounding
	Plastisol Consumer Products
Adhesives & Sealants	Plastisol Printing
	Hot-melt Adhesives
	Latex Adhesives
	Putty
	Plastisol / Vinyl Sealants
	Latex Caulks & Sealants
	Silane Modified Polymer Sealants
Paints & Coatings	Interior Latex Paints
	Exterior Latex Paints
	Industrial Coatings
	Special Purpose Coatings
	Lacquers - Nitrocellulosic & Acrylic
	Dispersions
